Full many a different way  
To every man there openeth . . .

And the high soul climbs  
the high way  
And the low soul gropes the  
low . . .

And in between, on the  
misty flats  
The rest drift to and fro.

But to every man there openeth  
A high way and a low . . .

And every man decideth  
The way his soul will go.

Ken Kovar is seriously taking **World Geography** to heart.

Shown here is Jim Eberly giving one of the many reports that must be prepared during the year, in **American History**.

## CLASSES

The girls in **Home Ec. III** plan and prepare their own food but use caution when eating it.

These girls in **Home Ec. II** class are discussing plans for future work in the kitchen.

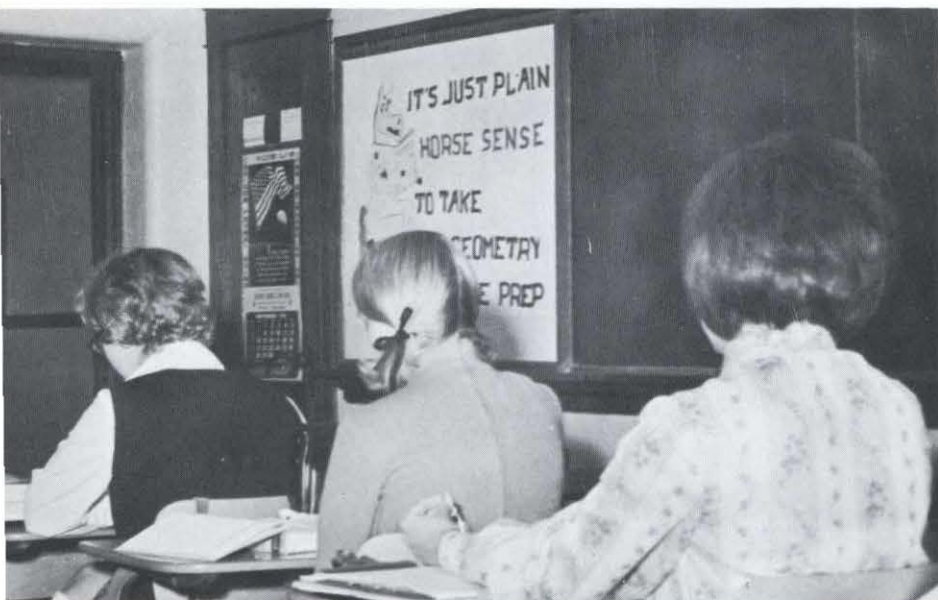

**Home Ec. I** teaches the freshmen girls the fundamentals of cooking, sewing, and child care. Here they are pondering over a test on these fundamentals.

A difficult but stimulating class is **Algebra I**.

Mary Schmit shows the **Algebra** class that boardwork can be fun.

These girls truly believe it's "horse sense" to take **Geometry**.

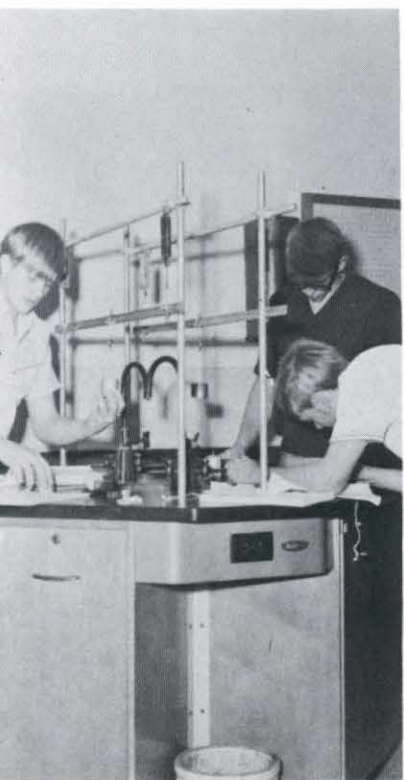

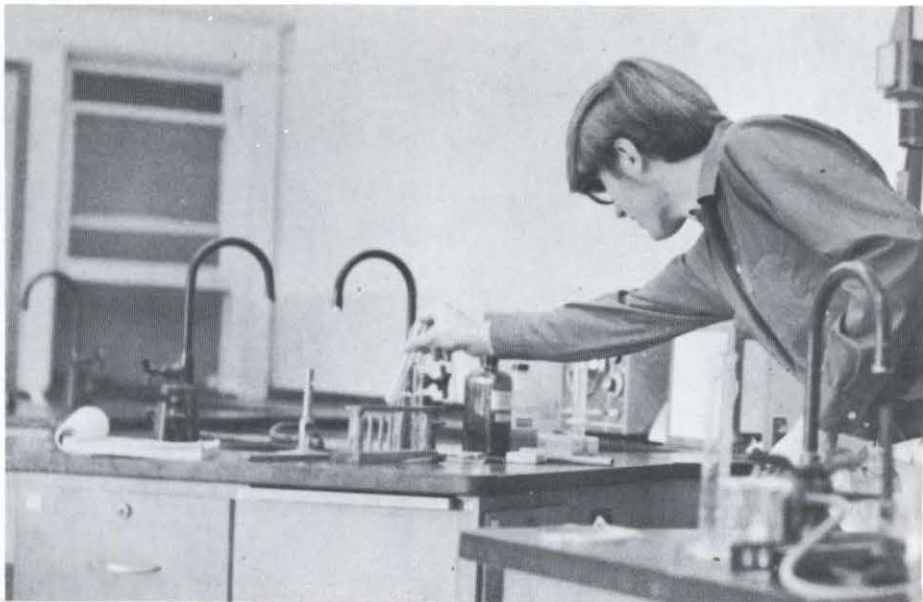

Wayne Divis shows that board work is an essential part of **General Math II**.

**General Math** students review the basics of math already learned and study them in greater depth.

**Chemistry** involves a lot of lab work as George Zeilinger can tell you. He is shown putting some classroom work to practical use.

Mr. Koehn and his **Trigonometry** class study advanced math. It makes for a very serious, somber seventh period.

y, Jerry, and Bob can tell you all  
out torque, equilibrium, and inertia.  
ey're putting their knowledge of  
ysics to work here.

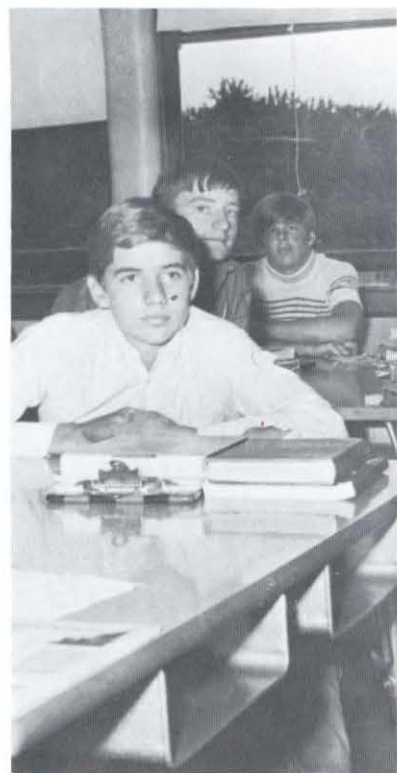

In **General Science**, Matt Foreman and Doug Wright are experimenting with inclined planes.

Some **Bookkeeping** students are more interested in the flash bulb than in their assignment.

Onlooking Bob Jones finds that **Biology** can be very interesting if Dan Mais explains it.

Mr. Bolton seems to be psyching the students out with his absorbing **General Business** class.

These girls in **Steno II** will some day become our efficient and necessary secretaries and office girls.

The basic functions taught in **Typing class** are the control and speed of your hands.

Pat Romshek is typing while Carmen Glock dictates to her in **Office Machines**.

**Steno I** is the first step a girl will take on the road to secretarial work.

Sentence structure is practiced on the board in **Spanish I**.

You do many interesting things in **Speech**, here we find the class forming discussion groups.

In **Spanish II** the students designed a Spanish bulletin board for the American Halloween.

In English IV the seniors study English Literature. Here we show some of the students discussing a bulletin board on one of the English Literature periods.

In English I the motto could be, "To question is to learn."

Many of the things you read in English II cause you to daydream about them.

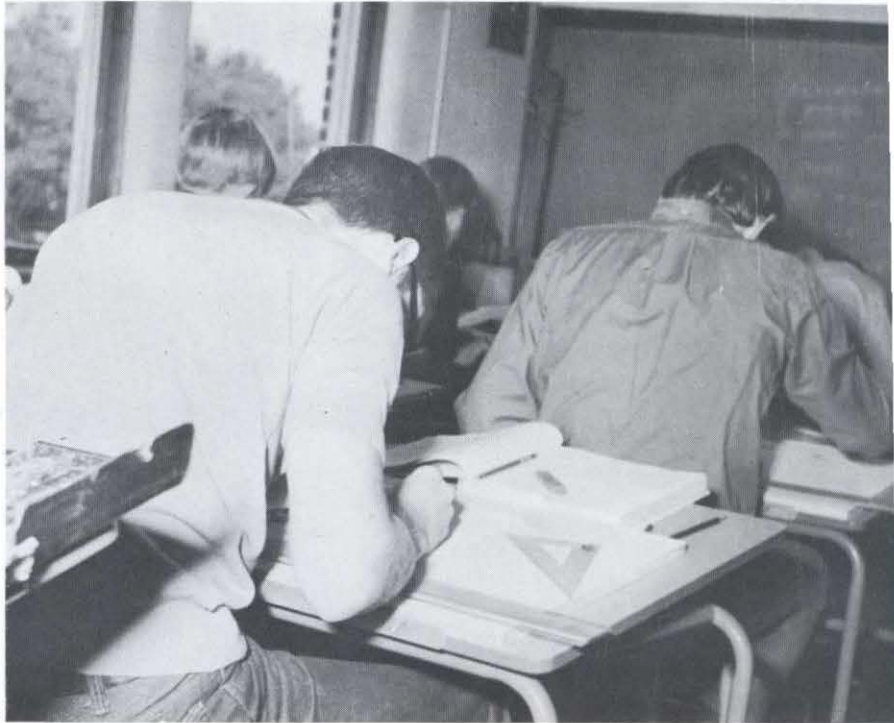

English III requires a lot of studying of the best of American Literature.

Jeff Meister, with the rest of his **Voc. Ag. I** class, is busy learning the basics of agriculture.

Fifth period **Mechanical Drawing** class is putting their newly learned skills in practice.

In **Voc. Ag. II**, skills in farm management and soil conservation are enlarged.

Mr. Stock believes in learning by doing. Here he is showing the **Voc. Ag. I** class how to adjust a plow with a level.

After a hard period of work, Shop I  
learns that cleaning up is half the job.

Shop II involves classroom as well as laboratory work.

These girls in P. E. class are waiting impatiently in line to use the new P. E. equipment recently installed.

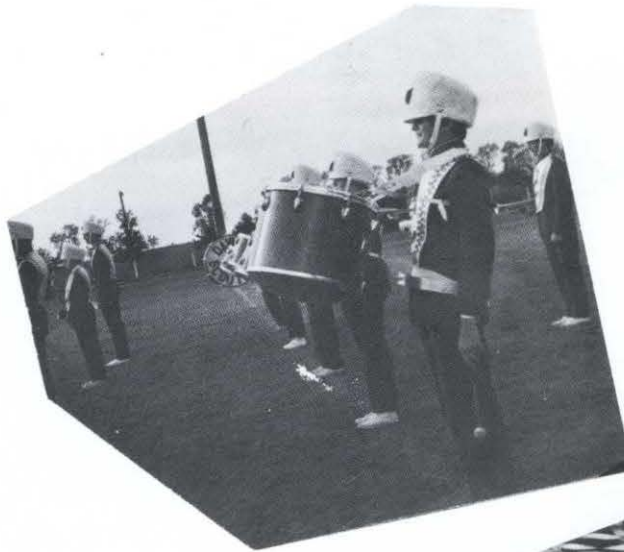

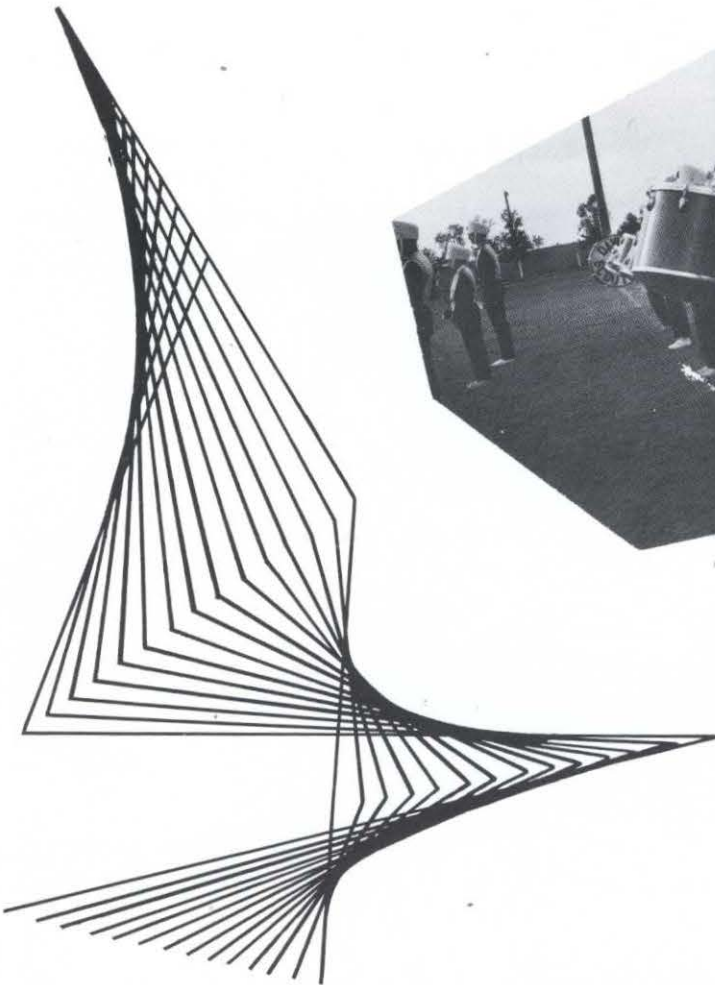

Second period P. E. class is running through some football plays for our cameraman.

# Student Council

The members of the Student Council — two freshmen, three sophomores, four juniors, and five seniors — represent the student body of DCHS and work to bring about changes the students feel are necessary. At our weekly meetings we've been made aware of student attitudes via the suggestion box and other means. Certainly we've not been successful in everything we've undertaken — no one can expect this — but we have put in a sincere effort to bring about change. Students must remember that the Student Council will only be as strong as those it attempts to serve.

The Future Homemakers are involved in the lives of all. Our likes are not our likes, But those shared by groups of others, Our hopes are not our hopes, But those wished about in common, Our dreams are to prepare for the future which is in the hands of its youth. We are the Future Homemakers of America and this is our way.

If someone would ask me what FFA is, or why I joined, I think I could best answer their question by the last verse of Robert Frost's poem "The Road Not Taken."

*I shall be telling this with a sigh  
Somewhere ages and ages hence:  
Two roads diverged in a wood, and I—  
I took the one less traveled by  
And that has made all the difference in  
the world.*

A David City opponent is picking a spot to land. The referee is checking to see if all is legal.

Ben Bohuslavsky helps an opponent do a handstand.

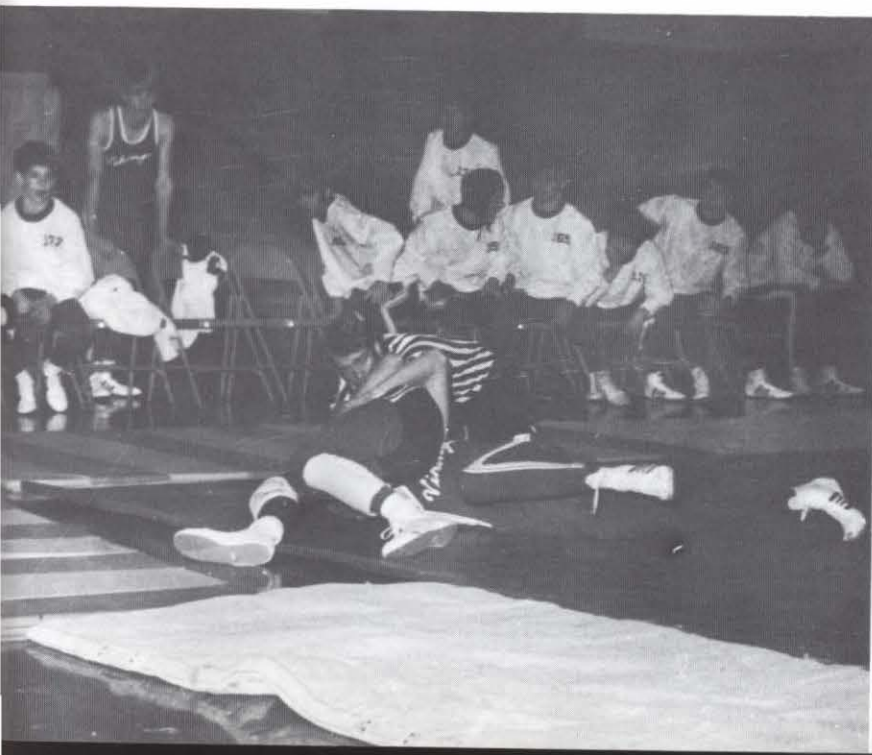

When it's all over, there's always the team members to come back to and give a pat on the back for a job well-done.

The coach said it is "mind over matter." Guess what it is!
